**1 Abstracts—nuclear reactor codes**

Virginia Nather, Ward Sangren

January 1959 **Communications of the ACM**, Volume 2 Issue 1

Publisher: ACM Press

Full text available: [pdf\(3.51 MB\)](#) Additional Information: [full citation](#)**2 Nuclear power plant diagnostics in APL**

Alexander O. Skomorokhov

July 1991 **ACM SIGAPL APL Quote Quad , Proceedings of the international conference on APL '91 APL '91**, Volume 21 Issue 4

Publisher: ACM Press

Full text available: [pdf\(903.20 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

We are interested in the development of Nuclear Power Plant (NPP) diagnostic systems and other complex systems of data processing. There are some questions on the subject: How to build these systems easily? How to build them fast? How to build them at a low price? And how to build them to be user friendly? Today, from our point of view, in the area of Nuclear Power Plant diagnostics, there is only one answer to these questions: We must use APL.

**3 GASP IV simulation of nuclear waste**Jeffery Lee Turek, Elden L. Deporter, Harold A. Kurstedt, Charles E. Rasbach, Steven K. Funk  
January 1981 **Proceedings of the 13th conference on Winter simulation - Volume 1**

Publisher: IEEE Press

Full text available: [pdf\(521.33 KB\)](#) Additional Information: [full citation](#), [abstract](#), [index terms](#)

The current governmental research and development program for the disposition of high-level nuclear wastes from both defense and commercial sources is modelled using a discrete GASP IV based simulation. The simulation utilizes, as input, actual and current data from various DOE management information systems. A sampling of disposition data contained within these systems are milestones, storage facility capacities, and predecessor and successor relations. Decision variables include facility ...

**4 Abstracts— additional nuclear reactor codes**

 Virginia Nather, Ward Sangren  
January 1960 **Communications of the ACM**, Volume 3 Issue 1  
Publisher: ACM Press  
Full text available: [pdf\(940.91 KB\)](#) Additional Information: [full citation](#)

**5 The role of computer systems in the nuclear power debate** 

 Kevin W. Bowyer  
April 1980 **ACM SIGCAS Computers and Society**, Volume 10 Issue 3-4  
Publisher: ACM Press  
Full text available: [pdf\(489.92 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#)

One of the primary reasons for the current "decline" of nuclear power is that reactors have not operated reliably. This unreliability has raised questions of both safety and economics. Computer systems have been a part of this failure of technology. If nuclear power is to be revived as an energy option for our country, both the quantity and quality of computer applications must increase.

**6 Computer based systems in boiling water reactors** 

 J. N. Shukla, J. A. Iubelt  
April 1980 **ACM SIGCAS Computers and Society**, Volume 10 Issue 3-4  
Publisher: ACM Press  
Full text available: [pdf\(474.71 KB\)](#) Additional Information: [full citation](#), [abstract](#)

This paper describes the application of computers to the General Electric Company's Boiling Water Reactor (BWR) type nuclear power plants. In the GE BWR plants, computers are used for Real Time Process Monitoring, Nuclear Steam Supply System Performance and Core Limit Evaluation, Balance of Plant Performance Evaluation, Historical Recording, and Control Rod Pattern Enforcement. These functions are performed by different systems and subsystems each consisting of one or more computers. This paper ...

**7 Highly vectorized algorithm for transient simulation of space reactor systems** 

B. Nassershariif, J. S. Peery, M. D. DeHart  
November 1988 **Proceedings of the 1988 ACM/IEEE conference on Supercomputing**  
Publisher: IEEE Computer Society Press  
Full text available: [pdf\(765.38 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Current interest in the application of nuclear reactor driven power systems to space missions has generated a need for an accurate systems model which is capable of handling the nonlinear transient simulation of such systems [1],[2]. A project to develop a code specifically designed to model and analyze space reactor systems is currently ongoing at Texas A&M. This code, named CENTAR (Code for Extended Nonlinear Transient Analysis of Extraterrestrial Reactors [3],[4]), is written especia ...

11 A combined simulation model of the nuclear fuel cycle

E. L. DePorter, Harold A. Kurstedt, Joel A. Nachlas

December 1977 **Proceedings of the 9th conference on Winter simulation - Volume 1**

**Publisher:** Winter Simulation Conference

Full text available:  pdf(327.18 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Strategies for dealing effectively with the complex nuclear fuel cycle are needed to assure the availability of the required nuclear energy portion of U.S. energy supplies. The vertical integration approach to assuring uranium fuel supplies is achieved through control or ownership of fuel cycle stages. Global system analysis is facilitated by identifying crucial control points in the fuel cycle. A GASP IV simulation model of the production and inventories of the sequentially prod ...

12 University Consortium for Industrial Numerical Analysis (UCINA)

 S. McKee  
December 1981 **ACM SIGNUM Newsletter**, Volume 16 Issue 4

**Publisher:** ACM Press

Full text available:  pdf(420.07 KB) Additional Information: [full citation](#), [abstract](#), [references](#)

The University Consortium for Industrial Numerical Analysis (UCINA) was formed on the 1st October 1979 with Dr. Sean McKee as the Project Coordinator. UCINA represents a collaborative effort by numerical analysts and interested applied mathematicians of the Universities of Bath, Brunel, Oxford, Reading and Imperial College, with strong support from the Division of Numerical Analysis and Computing Sciences at the National Physical Laboratory, to help with the solution of practical problems in ind ...

13 Effective application of computer graphics

 George W. Tressel  
April 1975 **ACM SIGGRAPH Computer Graphics , Proceedings of the 2nd annual conference on Computer graphics and interactive techniques SIGGRAPH '75**, Volume 9 Issue 1

**Publisher:** ACM Press

Full text available:  pdf(8.71 MB)

Additional Information: [full citation](#), [references](#)

14 A case study in the use of defect classification in inspections

Diane Kelly, Terry Shepard

November 2001 **Proceedings of the 2001 conference of the Centre for Advanced Studies on Collaborative research**

**Publisher:** IBM Press

Full text available:  [pdf\(165.02 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

In many software organizations, defects are classified very simply, using categories such as Minor, Major, Severe, Critical. Simple classifications of this kind are typically used to assign priorities in repairing defects. Deeper understanding of the effectiveness of software development methodologies and techniques requires more detailed classification of defects. A variety of classifications has been proposed. Although most detailed schemes have been developed for the purpose of analyzing soft ...

**Keywords:** orthogonal defect classification, software engineering, software maintenance, software metrics, software testing, software validation

15 NUFACTS: A tool for the analysis of nuclear development policies

Mark B. Triplett, Theodore L. Willke, John D. Waddell

January 1977 **Proceedings of the 9th conference on Winter simulation - Volume 2**

**Publisher:** Winter Simulation Conference

Full text available:  [pdf\(582.16 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

NUFACTS, the Nuclear Fuel Cycle Activity Simulator, is a combined continuous/discrete simulation of the nuclear power economy. This model has been useful in the evaluation of nuclear development policies as it projects the economic and resource impacts attributable to a given policy. A recent application of NUFANTS has involved the economic evaluation of plutonium recycle options in light-water reactors. Based upon the GASP IV simulation language, NUFANTS provides a highly flexib ...

16 Model reliability and software quality assurance in simulation of nuclear fuel waste management systems

 Tuncer I. Ören, Maurice S. Elzas, Grant Sheng

October 1985 **ACM SIGSIM Simulation Digest**, Volume 16 Issue 4

**Publisher:** ACM Press

Full text available:  [pdf\(1.16 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#)

As is the case with all scientific simulation studies, computerized simulation of nuclear fuel waste management systems can introduce and hide various types of errors. Frameworks to clarify issues of model reliability and software quality assurance are offered. Potential problems with reference to the main areas of concern for reliability and quality are discussed; e.g. experimental issues, decomposition, scope, fidelity, verification, requirements, testing, correctness, robustness are treated w ...

17 Real world applications: Heuristic rules embedded genetic algorithm to solve in-core fuel management optimization problem

 Fatih Alim, Kostadin Ivanov

June 2005 **Proceedings of the 2005 conference on Genetic and evolutionary computation GECCO '05**

**Publisher:** ACM Press

Full text available:  [pdf\(208.13 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Because of the large number of possible combinations for the fuel assembly loading in the core, the design of the loading pattern (LP) is a complex optimization problem. It requires finding an optimal fuel arrangement in order to achieve maximum cycle length while satisfying the safety constraints. The objective of this study is to develop a loading pattern optimization code. Generally in-core fuel management codes are written for specific cores and limited fuel inventory. One of the goals of th ...

**Keywords:** genetic algorithms, heuristic rules, in-core fuel management, loading pattern, pressurized water reactor (PWR)

**18 A systematic approach to the development and validation of critical software for nuclear power plants**

C. V. Ramamoorthy, F. B. Bastani, J. M. Favaro, Y. R. Mok, C. W. Nam, K. Suzuki  
September 1979 **Proceedings of the 4th international conference on Software engineering**

**Publisher:** IEEE Press

Full text available:  [pdf\(911.14 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The power industry is becoming increasingly interested in the use of digital computers within nuclear plant protection systems in order to satisfy increased safety requirements, provide greater operating flexibility, minimize spurious forced outages, and (in conjunction with multiplexing) to meet separation requirements. However, the development and licensing of digital safety systems has been hindered to date by the difficulty of validating the software. A methodology is propose ...

**19 Genetic algorithms: Application of genetic algorithm to optimize burnable poison placement in pressurized water reactors**

 Serkan Yilmaz, Kostadin Ivanov, Samuel Levine  
June 2005 **Proceedings of the 2005 conference on Genetic and evolutionary computation GECCO '05**

**Publisher:** ACM Press

Full text available:  [pdf\(1.47 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

An efficient and a practical genetic algorithm tool was developed and applied successfully to Burnable Poisons (BPs) placement optimization problem in the reference Three Mile Island-1 (TMI-1) core. Core BP optimization problem means developing a BP loading map for a given core loading configuration that minimizes the total Gadolinium (Gd) amount in the core without violating any design constraints. The number of UO<sub>2</sub>/Gd<sub>2</sub>O<sub>3</sub> pins and Gd<sub>2</sub>O<sub>3</sub> con ...

**Keywords:** burnable poison, decision variables, gadolinium, genetic algorithm, nuclear, optimization, reactor

**20 A network modeling and analysis technique for the evaluation of nuclear safeguards systems effectiveness**

Floyd H. Grant, Robin J. Miner, Dennis Engi  
December 1978 **Proceedings of the 10th conference on Winter simulation - Volume 2**

**Publisher:** IEEE Computer Society Press

Full text available:  [pdf\(618.34 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Nuclear safeguards systems are concerned with the physical protection and control of nuclear materials. The Safeguards Network Analysis Procedure (SNAP) provides a convenient and standard analysis methodology for the evaluation of safeguards system effectiveness. This is achieved through a standard set of symbols which characterize the

various elements of safeguards systems and an analysis program to execute simulation models built using the SNAP symbology. The reports provided by the SNAP ...
